

vibe check — 90-day card system

3 cards per day for 90 days. Everyone gets the same cards on the same days. All 270 cards live in `vibe-check-cards-v3.csv`. Regular cards expire at midnight if neither person answers — no makeup. **Day 90 is a hard stop.**

Anchor days

11 days carry an anchor question. An anchor appears on its day, never earlier. The journey pauses until **both** people answer it — no new cards unlock behind it. The 90-day clock keeps running; stalled days are lost.

Day	Anchor	Day	Anchor
7	Pace	45	A belief that might end us
14	Intent	52	First intimacy deep
21	Exclusivity	66	Second intimacy deep
28	Labels	83	Forgiveness limits
34	Marriage	90	The Decision
38	Kids		

The nudge — what happens in the app

Triggered when one person has answered a pending anchor and the other hasn't. Days count from the first one-sided answer. Nudges are system-sent only — the waiting partner has no button to trigger one.

Hold day	Silent partner	Waiting partner
2	Push: "An anchor is waiting. [Name] answered two days ago." Opening the app lands on the anchor card. Button: Answer	Card shows "waiting on them"
	Push: "Still holding. Answer it, or release the	

4	connection — both are honest." Anchor screen now shows two buttons: Answer / Release	Status line: "It's been quiet on their side."
7	Push marked final: "Without an answer in 48 hours, this connection will be released." Full-screen notice with countdown. Buttons: Answer / Release	Notified: "A final notice was sent."
9	Connection auto-releases. Neutral closing screen.	Closing screen: "Released. This one went quiet, so we closed it — you didn't have to wait. You showed up the whole way."

Any answer ends the hold instantly and the journey resumes the next day. A released connection can be restored within 30 days if both agree; after that, shared history clears permanently.
